

ALPHA NOTICE TO SUBSCRIBERS

August 23, 2010

No. 2010-0110

Alpha API Version Compliance and Support Provision

Further to Subscriber Notices (*No. 2009-0183, No. 2010-0016 and No. 2010-0089*) regarding Alpha API version support, Alpha will be contacting subscribers who are still running on API version 3.5.3 or earlier to confirm their plans to upgrade to the latest libraries. New EMAPI APIs will be made available in late August 2010. Clients are reminded that the **Alpha upgrade to v4.4 is backward/forward compatible** with previous version API libraries back to v4.2.1.

After the Alpha ATS trading engine upgrade to v4.4 scheduled for November 22, 2010, API v3.5.3 or earlier will be unsupported. Alpha will not bear responsibility for issues reported by subscribers running on an unsupported API version.

Should you have any questions, require additional clarification or support to ensure your organization remains API version compliant please contact Alpha Group Trading Operations and Services at [647-259-0450](tel:647-259-0450) / [877-ATS-ALF1](tel:877-ATS-ALF1) or via email at clientservices@alphatradingsystems.ca.
